## **SERGEY V. DMITRIEV**

Sergey V. Dmitriev (Tomsk, Russia, 1961) since 2008 is the Head of Laboratory at the Institute for Metals Superplasticity Problems, Ufa, Russia. He graduated from Tomsk State University with a M.S. degree in 1984, and completed the PhD degree in structural mechanics at Tver State University, Russia, in 1988. He obtained a second PhD degree in computer modeling of incommensurate phases in dielectrics from the University of Electro-Communications, Tokyo, Japan, in 1999. He received the Habilitation in 2008 with a dissertation on solitary wave dynamics in discrete systems from the Altai State Technical University, Barnaul, Russia. His scientific interests are in discrete breathers in crystals, solitary waves in discrete systems; evolution of defect structures in solids during plastic deformation; mechanical properties of graphene; and atomistic simulations.
