Matériel nécessaire / Necesitarás:

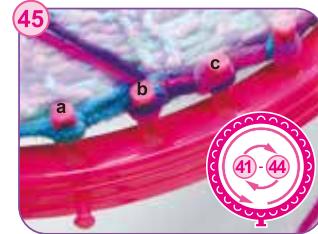

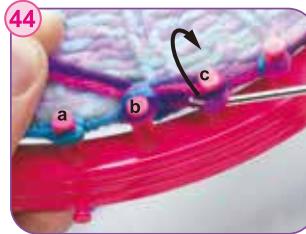

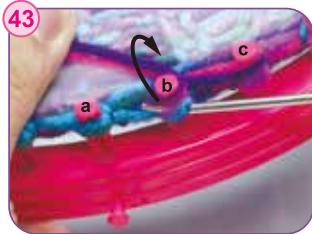

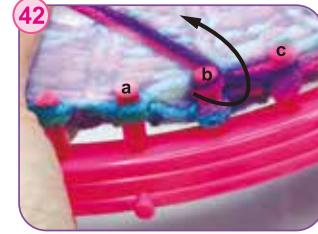

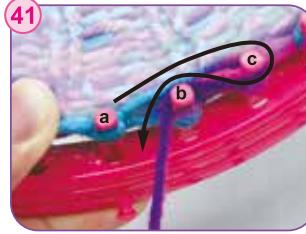

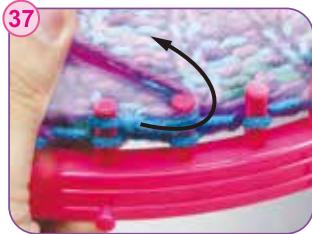

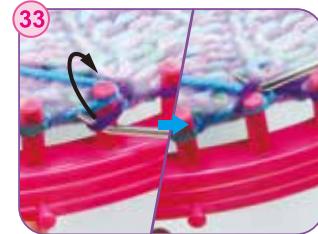

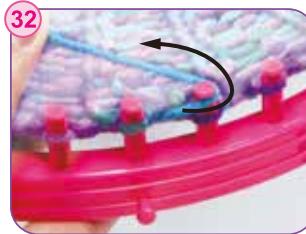

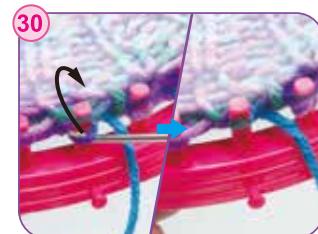

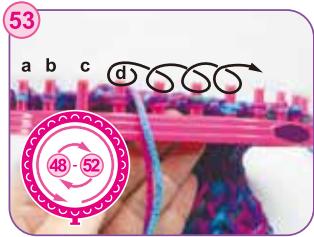

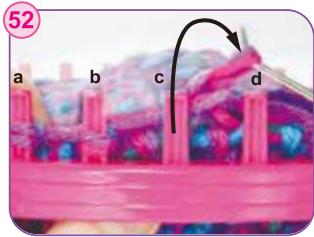

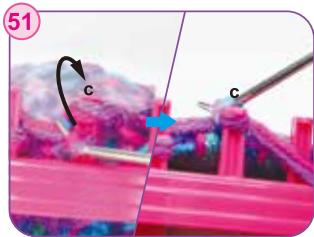

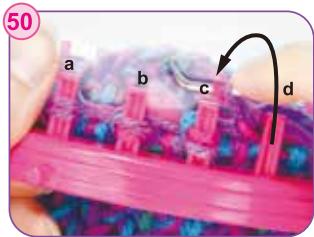

## Mode d'emploi / Instrucciones

Tricot Bonnet / Gorro

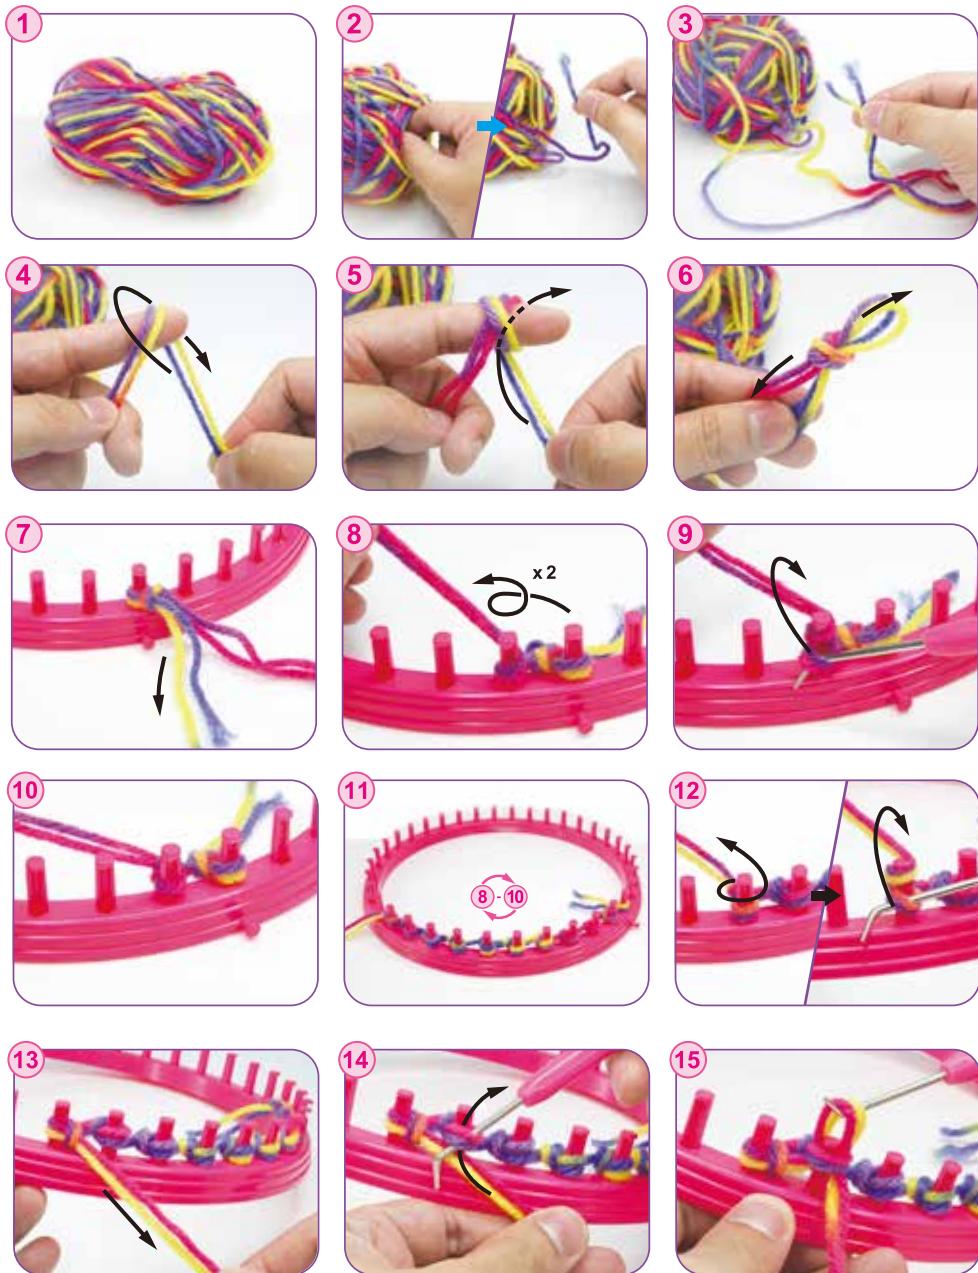

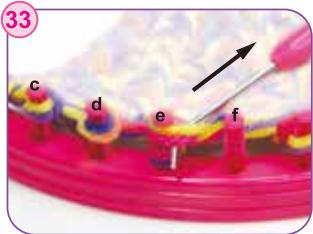

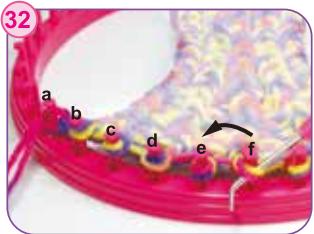

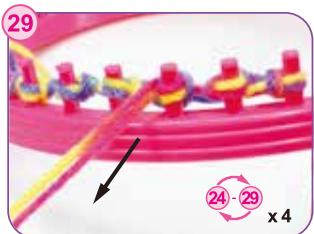

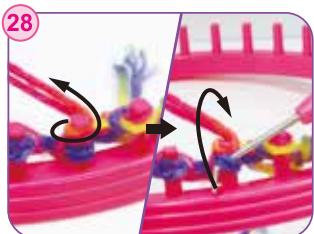

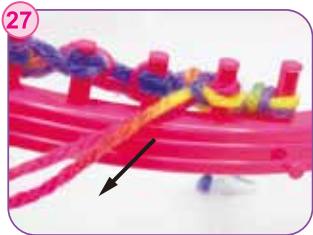

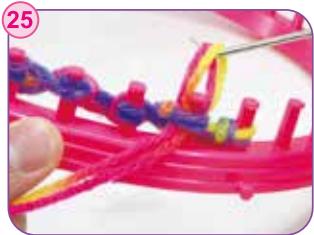

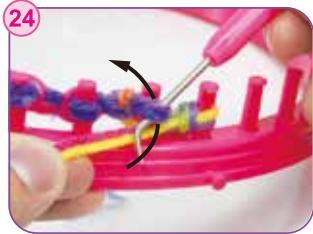

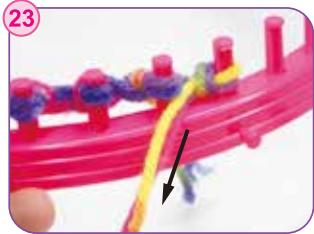

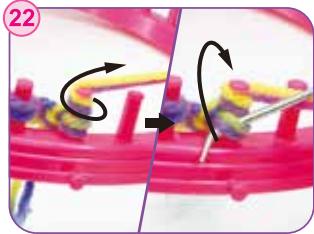

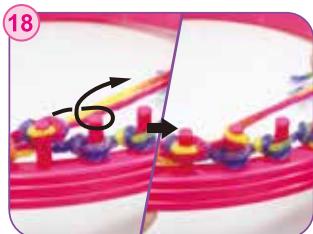

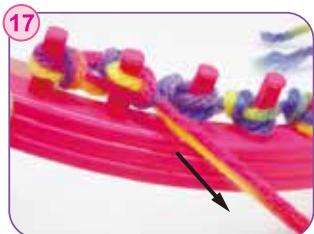

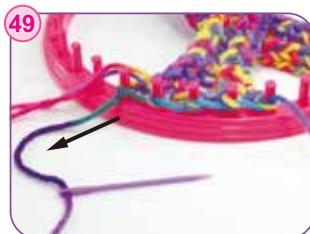

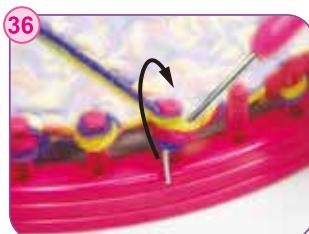

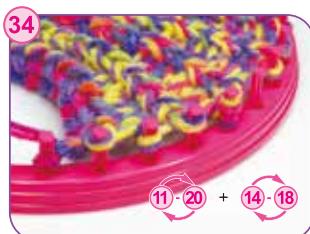

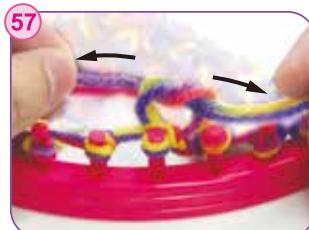

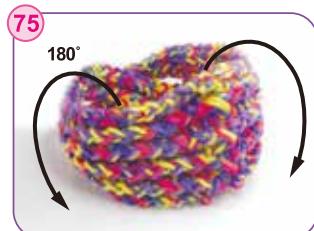

## Serre-tête / Diademas tejidas en crochet

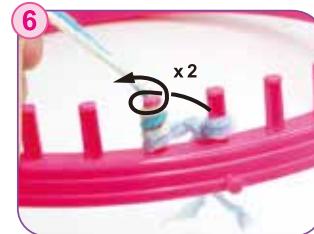

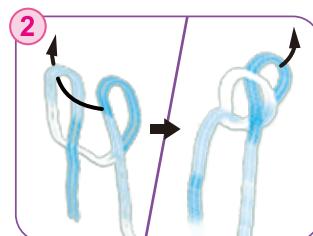

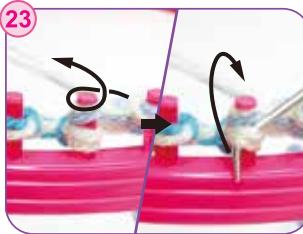

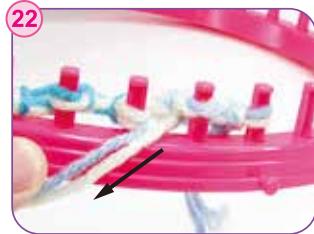

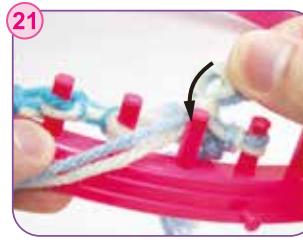

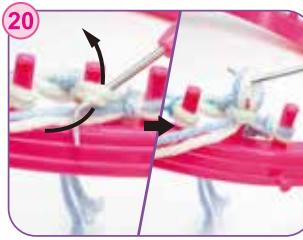

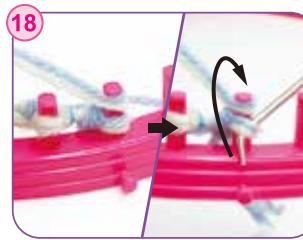

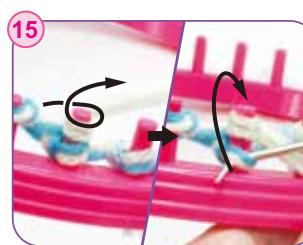

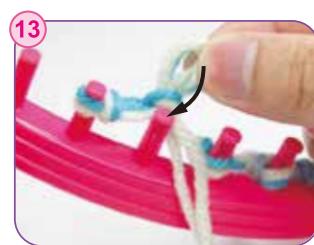

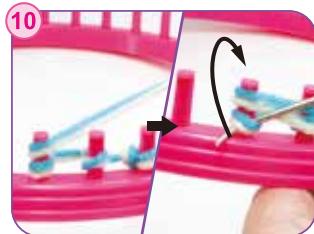

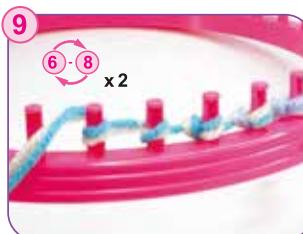

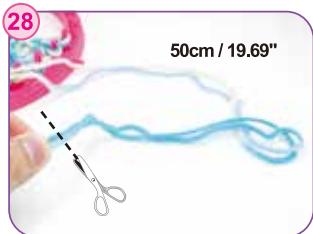

### Bracelet / Pulsera

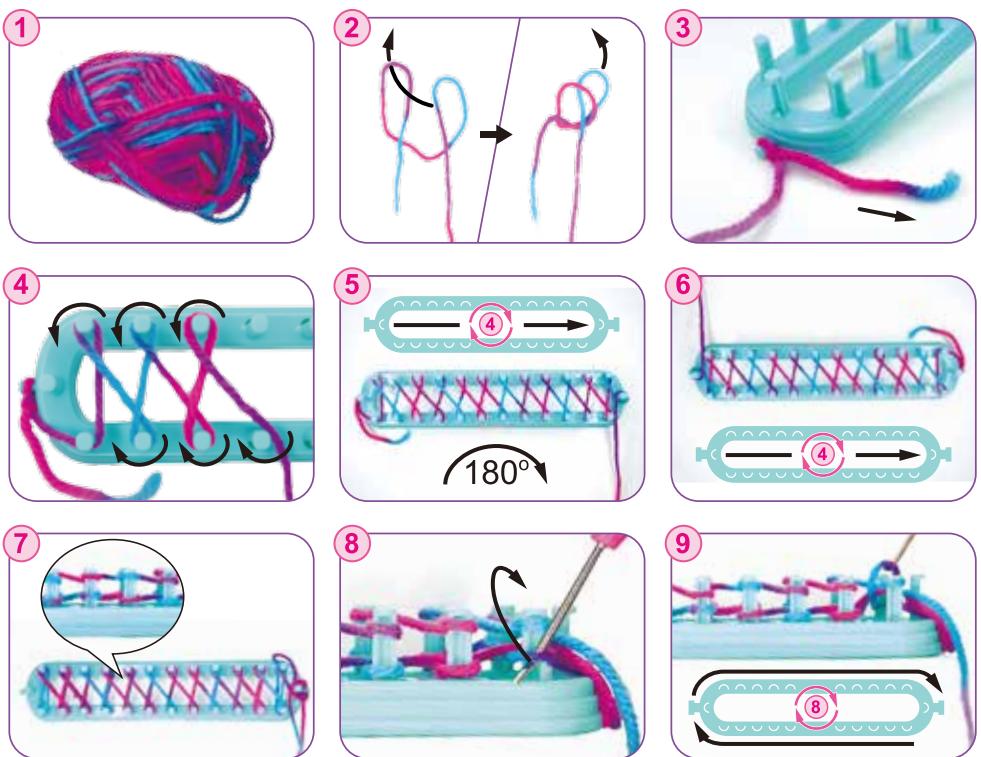

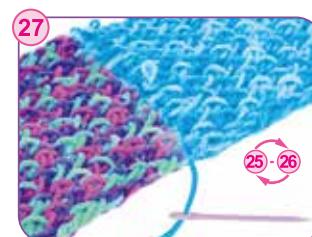

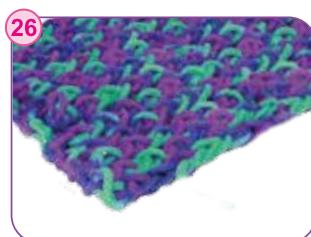

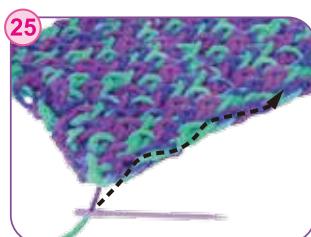

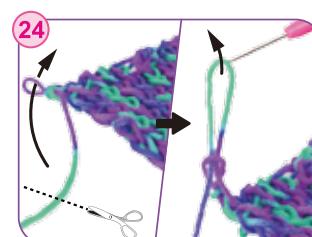

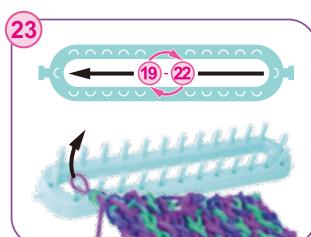

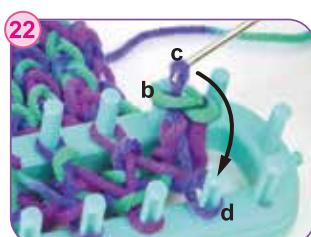

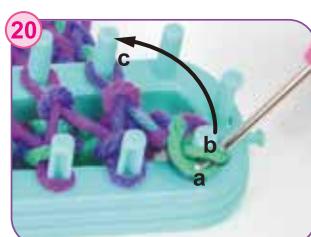

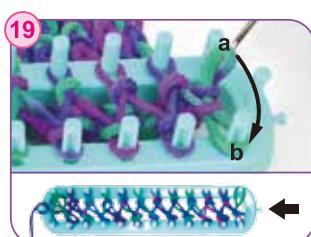

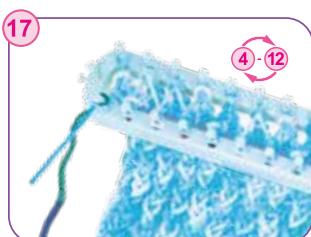

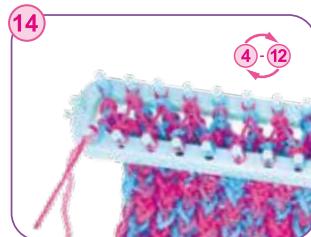

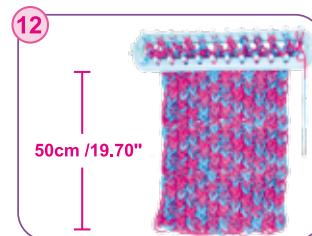

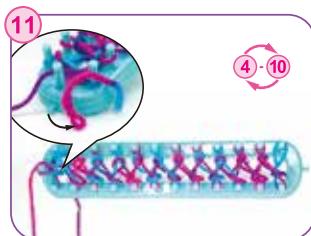

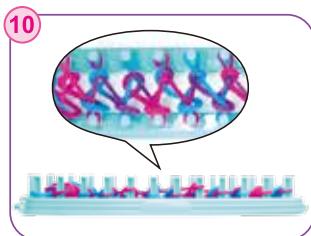

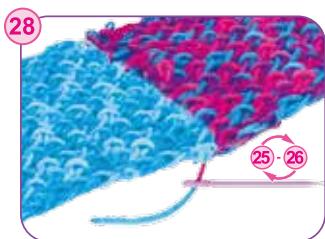

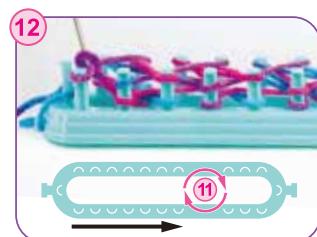

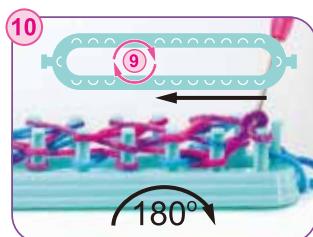

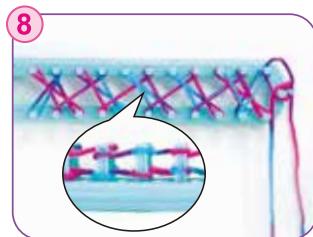

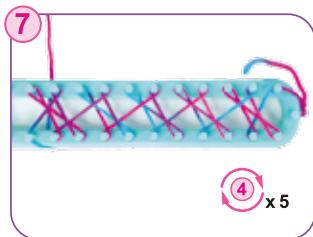

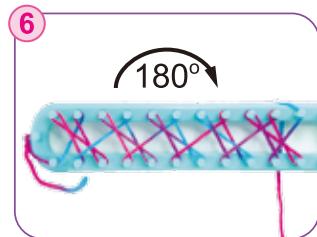

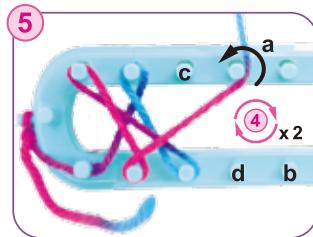

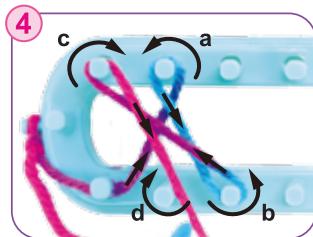

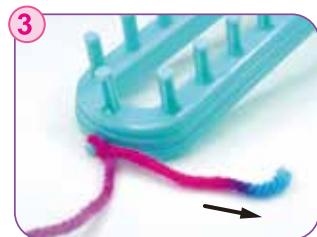

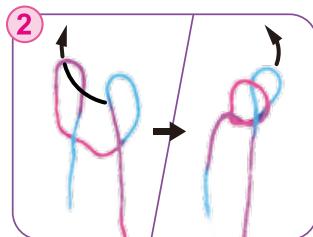

## Écharpes / Bufanda

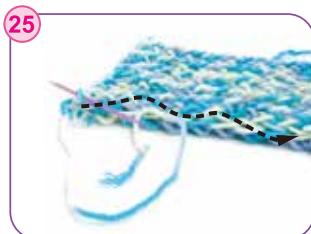

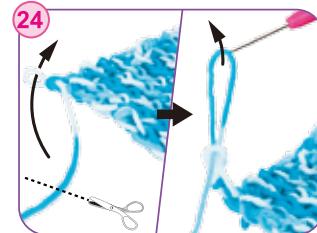

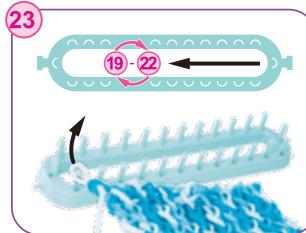

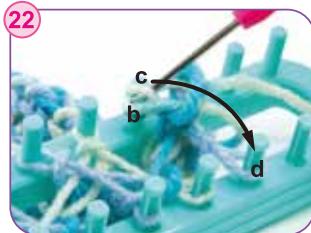

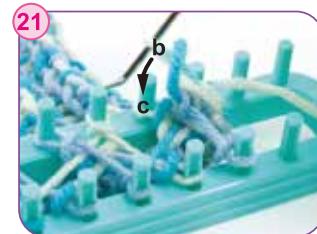

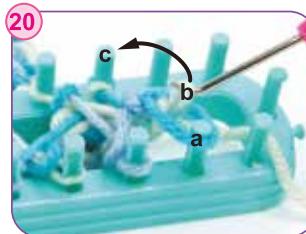

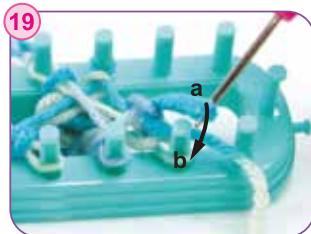

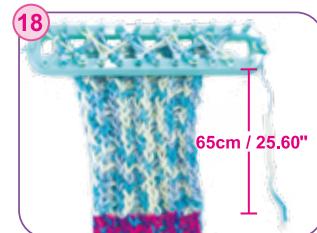

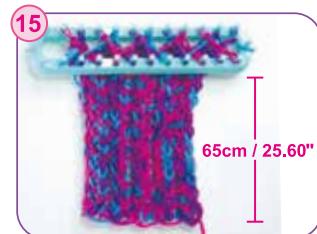

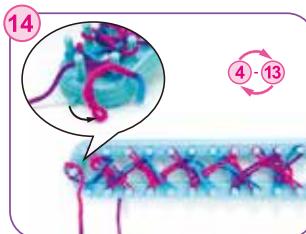

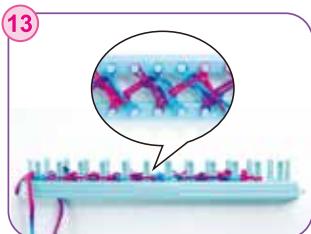

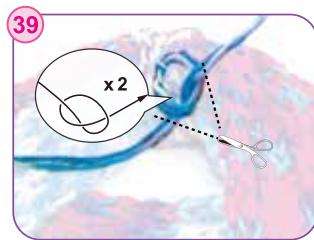

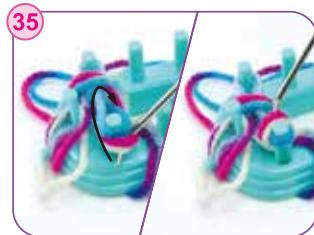

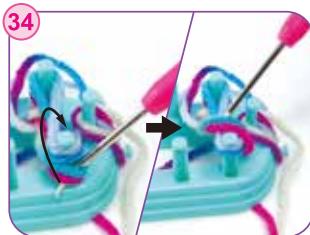

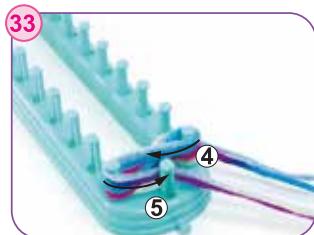

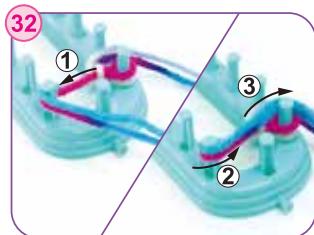

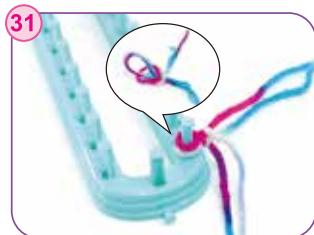

## Echarpes / Bufanda

## Réalisez votre propre écharpe

### Choisissez le style de votre choix.

Faites un nœud coulant en laissant 10 cm de fil d'un côté et passez le nœud dans le clou d'ancre du tricotin (après avoir fait deux rangées, le fil ancré doit être retiré). Passez le fil autour du premier clou. Passez autour de tous les clous (sans trop serrer) et répétez l'opération de gauche à droite. Maintenez le fil et poussez les boucles vers le bas sur les clous. Faites pivoter votre tricotin à 180° et continuez à faire passer le fil jusqu'à ce qu'il y ait 2 boucles sur chaque clou. Faites passer les boucles du bas au-dessus des clous. (Suivez les étapes indiquées sur les images). Répétez cette opération jusqu'à obtenir la longueur désirée.

### Comment enlever les boucles

Commencez par enlever la boucle située sur le clou du rang arrière. Prenez la première boucle et amenez-la vers le clou avant, faites passer la boucle du bas à travers celle-ci et enlever la boucle du bas du clou avant de l'amener vers le clou voisin sur le rang avant. Répétez cette opération jusqu'à ce que la dernière boucle soit enlevée du tricotin. Coupez le fil et passez-le à travers la dernière boucle pour faire un nœud bien serré. Passez le fil dans une aiguille à laine, insérez l'aiguille à un endroit sur le rebord de l'écharpe et tirez le fil. Répétez cette opération jusqu'à ce que le fil ne soit plus visible.

\*\*\*Veuillez à ne pas trop serrer le fil autour des clous du tricotin pendant l'opération.\*\*\*

## Cómo hacer tu propia bufanda

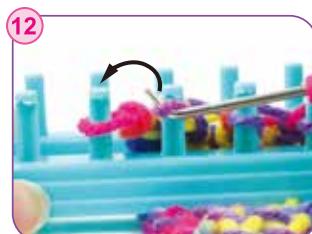

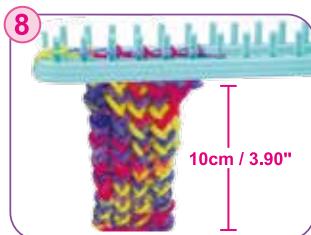

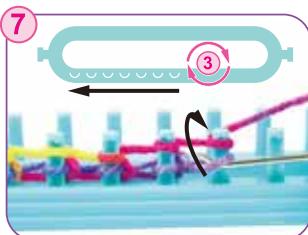

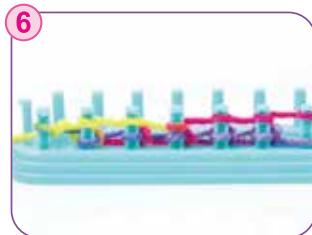

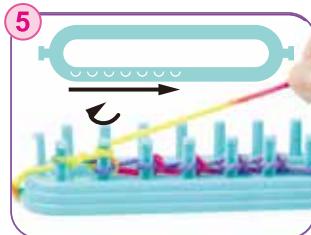

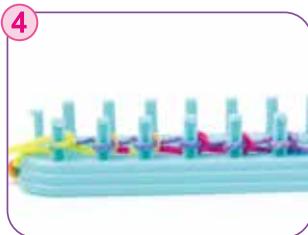

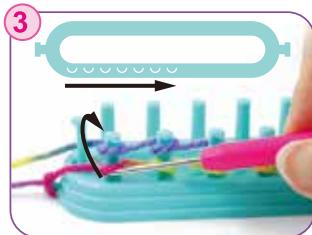

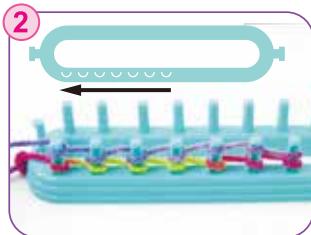

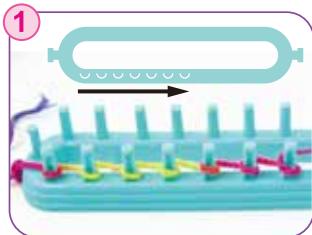

### Elije el estilo que quieres confeccionar.

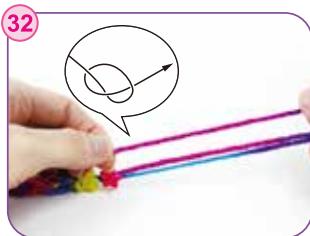

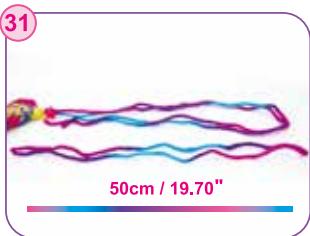

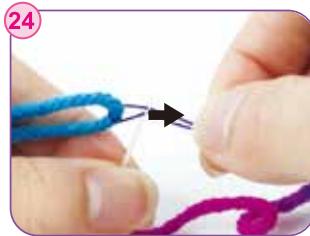

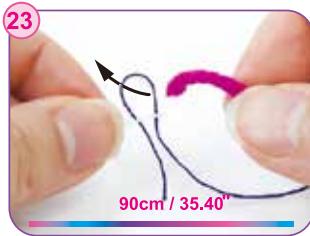

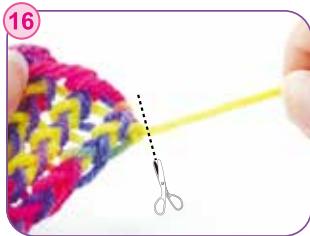

Haz un nudo corredizo, dejando un bucle de 10 cm (4 pulgadas) y únelo a una clavija de anclaje del telar (Después de tejer 2 filas, el hilo anclado debe retirarse). Enrolla el hilo de trabajo alrededor de la primera clavija. Enrolla todas las clavijas (no las aprietas demasiado) y sigue enrollando de izquierda a derecha. Sujeta el hilo de trabajo y presiona los bucles hacia abajo en las clavijas. Gira el telar a 180° y sigue enrollando hasta que haya 2 bucles en cada clavija. Pasa de los bucles inferiores sobre la parte superior. (Sigue los pasos que muestran las figuras). Continúa con este procedimiento hasta alcanzar la longitud deseada.

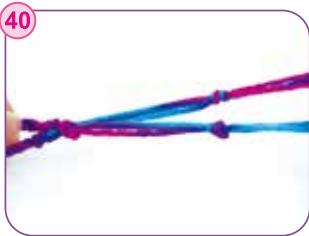

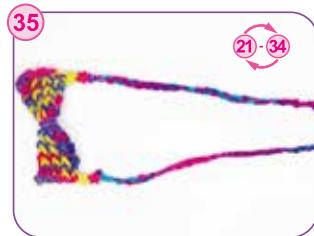

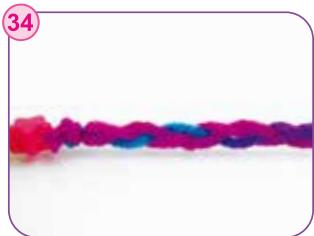

### Cómo cerrar los puntos

Comienza a cerrar desde la clavija opuesta del otro lado. Toma el primer bucle y tráelo al frente, Pasa el bucle inferior a través de él y saca el bucle inferior de la clavija. Luego, tráelo a la siguiente clavija delantera. Sigue con este procedimiento hasta que hayas sacado el último bucle de la clavija. Corta el hilo de trabajo y pasa la última punta a través del último bucle para hacer un nudo bien apretado. Pasa el hilo de trabajo por la aguja, inserta la aguja en cualquier punto del borde de la bufanda y tira del hilo. Repite la operación hasta que el hilo desaparezca.

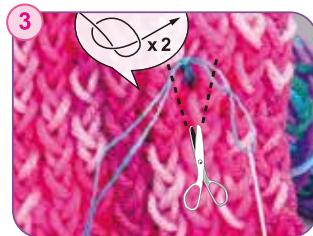

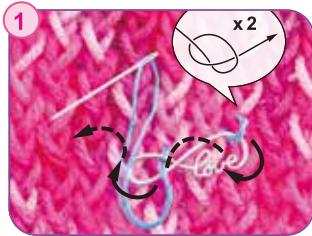

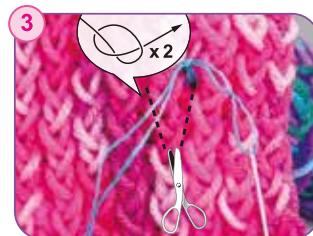

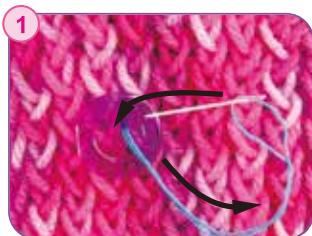

\*\*\*Ten cuidado para no tirar demasiado al enrollar el hilo alrededor de las clavijas.\*\*\*

## • Conseils

## • Consejos

Tirez le fil du centre de la pelote pour qu'elle conserve sa forme. Pincez la laine qui se trouve en plein centre. Tirez-la et trouvez l'embout du fil.

Coloca el hilo en el centro de la madeja para mantenerla organizada. Saca el hilo del mismo centro. Tira del hilo hacia afuera y toma la punta.
